Giza, Egypt

PROFESSIONAL SUMMARY

Cybersecurity and network engineer with a B.Sc. in Computer Systems Networking, an ITI Cyber Security diploma, and CCNA, CEH, and Fortinet certifications, targeting SOC Analyst roles. Hands-on with SIEM and detection tooling (Splunk, Wazuh, Security Onion, Wireshark) and with vulnerability reconnaissance using Nmap, Shodan, and custom Python scanners. Two years of real-time network and device troubleshooting at AT&T (Sutherland) and Concentrix, plus three years teaching networking and security to 500+ students. Founder of Fekra Tech Academy; builds full-stack web applications and ESP32 IoT systems.

CORE SKILLS

Security Operations

SIEM monitoring (Splunk, Wazuh, Security Onion) · log & alert analysis · incident triage and escalation · SOC workflows

Network Security

TCP/IP · routing & switching · DNS/DHCP · Fortinet firewalls · packet analysis with Wireshark · network defense (NDE)

Threat & Vulnerability

Nmap · Shodan.io reconnaissance · vulnerability auditing · ethical hacking (CEH) · CTF challenges (EG-CERT)

Endpoint & Systems

Windows & Linux administration · Windows Server (MCSA) · endpoint security · mobile device troubleshooting

Development & Automation

Python scripting · Node.js / Express · MongoDB Atlas · Playwright · deployment on Vercel & Railway

Embedded & IoT

ESP32 · Arduino · Apple HomeKit integration · sensor and relay control

Teaching & Leadership

Curriculum design · led an instructor team · 500+ students trained · bilingual delivery (Arabic / English)

FEATURED PROJECTS & ACADEMY

Fekra Tech Academy

Tech academy and learning platform training students aged 8–18 and young adults in programming, networking, cybersecurity, AI, and Arduino hardware. Bilingual cohorts with real projects.

`Node.js · Express · MongoDB Atlas · Vercel`

`fekra-tech-acad.vercel.app`

Recon-Auditor Security Tool

Web-based reconnaissance and vulnerability-auditing tool. Combines Shodan.io lookups, Playwright-driven checks, and custom Python scanning scripts behind a web dashboard.

`Python · Shodan API · Playwright · GitHub`

`github.com/SD3bes/recon-auditor-showcase`

IoT Smart Home Automation

Graduation project: ESP32-based smart home controller integrated with Apple HomeKit and Siri voice commands, later packaged as a teaching kit for the academy.

`ESP32 · Arduino · Apple HomeKit · Siri`

`fekra-smart-home-kit.vercel.app`

TOOLS & TECHNOLOGIES

`Splunk` `Wazuh` `Security Onion` `Wireshark` `Nmap` `Shodan` `Fortinet FortiGate` `Python` `Playwright` `Node.js` `Express` `MongoDB Atlas` `ESP32 / Arduino` `TCP/IP` `DNS & DHCP` `Routing & Switching` `Windows / Linux` `Git & GitHub` `Vercel & Railway`

CERTIFICATIONS

CCNA — Cisco Certified Network Associate

CEH — Certified Ethical Hacker – EC-Council

Fortinet FCA — Fortinet Certified Associate in Cybersecurity

Fortinet FCF — Fortinet Certified Fundamentals in Cybersecurity

Junior Cybersecurity Analyst — Cisco Networking Academy Career Path

NDE — Network Defense Essentials – EC-Council

Endpoint Security — Cisco Networking Academy

MCSA — Microsoft Certified Solutions Associate

PROFESSIONAL EXPERIENCE

Cybersecurity & SAS Intern

Sep 2024

CIB Egypt · Internship · Cairo, Egypt

- Rotated through the cybersecurity and SAS analytics teams at Egypt's largest private-sector bank, observing enterprise security operations first-hand
- Studied how security monitoring, access controls, and data analysis workflows support threat and fraud detection in a regulated environment

Technical Support Engineer

May 2024 - Jan 2026

Sutherland (AT&T account) · Full-time

- Resolved complex connectivity, configuration, and device faults for AT&T mobility customers in a high-volume support environment
- Diagnosed network-side problems (coverage, provisioning, data sessions) and coordinated fixes to restore service continuity
- Triaged and isolated issues in real time, working across device, carrier-network, and account layers before escalating
- Built the incident-handling discipline, documentation habits, and calm-under-pressure analysis that SOC work demands

Technical Support Specialist

Nov 2023 - May 2024

Concentrix · Full-time

- Provided first-line technical support, investigating and resolving system and connectivity issues
- Handled escalations with clear communication and fast, documented resolutions

TEACHING & LEADERSHIP

Founder & Lead Instructor Current

2026 - Present

Fekra Tech Academy · Egypt (Hybrid / Online)

- Founded and run the academy end to end: curriculum roadmaps, student instruction, and hosting of the academy's web platform
- Teach programming, software engineering, networking, cybersecurity, IT, and Arduino hardware to students aged 8–18 and young adults
- Produce educational video demonstrations and run digital marketing campaigns to grow enrolment

Instructor – DEMI & DECI Programs Current

May 2026 – Present

iSchool · Part-time · Giza, Egypt

DEMI — DIGITAL EGYPT MARVELS INITIATIVE

- Delivered 8 Game Development & AI Programming sessions (6 in person, 2 online) to 160+ students over two intensive days
- Guided students through hands-on project builds in AI-assisted development and interactive games, earning strong student feedback

DECI — DIGITAL EGYPT CUBS INITIATIVE

- Delivered in-person Advanced Cybersecurity (Level 3) sessions to DECI interns through practical demonstrations and interactive activities
- Mentored interns on networking fundamentals, security best practices, and real-world attack and defense examples

Head of Technician Instructors Team

May 2023 – May 2026

Little Programmers Initiative (أكاديمية المبرمج الصغير) · Part-time · Egypt (Hybrid)

- Led the technician instructor team delivering programming and networking programs across Egypt
- Trained and mentored 500+ students in programming and networking fundamentals
- Coordinated instructors, standardised lesson delivery, and contributed to student-facing technical projects

Technical Head

2021 – 2025

CNSC – Arab Open University · Student Club

- Managed the club's technical projects and coordinated team activities across four academic years
- Delivered networking and cybersecurity workshops to fellow students as lead instructor

CYBERSECURITY ACTIVITY

CTF Competitions & Vulnerability Research

- Competed in Capture The Flag (CTF) challenges run by EG-CERT, covering threat analysis, basic exploitation techniques, and problem-solving under time pressure
- Conducted independent security research and vulnerability auditing using Shodan.io, Playwright, and custom Python scanning scripts, packaged as the Recon-Auditor tool

EDUCATION

B.Sc. — Computer Systems Networking & Telecommunications

Arab Open University (in partnership with The Open University, UK)

Sep 2021 – Jun 2025

Graduation project: Siri-integrated IoT Smart Home Automation System built on ESP32 with Apple HomeKit

Diploma — Cyber Security (120 hours)

Information Technology Institute (ITI)

Aug 2024 – Jan 2025

Network fundamentals, security core concepts, and hands-on defensive labs
